<https://www.eisemanncenter.com/event/i/7705/d/magic-therapy-workshop#buy>

Internationally renowned illusionist Kevin Spencer is coming to Richardson, Texas with a new magic and illusion performance designed to be welcoming to children and families with autism or other disabilities that create sensory sensitivities.

EPIC REMINDERS

Holiday Closing - Monday, September 6th

Our Epic Strides Office will be closing at 4:00PM on Thursday, September 16th for our monthly staff training.

Parent Tip for September

Question:

Why are full time ABA programs recommended for young learners?

Early interventions occur at or before preschool age, as early as 2 or 3 years of age. In this period, a young child's brain is still forming, meaning it is more "plastic" or changeable than at older ages. Because of this plasticity, treatments have a better chance of being effective in the longer term. Early interventions not only give children the best start possible, but also the best chance of developing to their full potential. The sooner a child gets help, the greater the chance for learning and progress.
